

Information Note Regarding the Certificates of Origin and Form A Documents under MEDOS System

Turkey will conduct a new implementation under the existing MEDOS system which the movement certificates and origin documents are to be issued by the Turkish authorities in electronic way.

By the new implementation which will be valid as of 8th of April, 2020 the certificates of origin and Form A documents will be endorsed only electronically by the chambers of commerce/industry and the unions through MEDOS. There will be no wet-ink signatures or stamps on these documents. Each electronically issued and endorsed certificate will bear a unique and unreproducible QR/verification code so that the accuracy and authenticity of the documents could be easily verified by the importing authority.

It's kindly requested to inform your related bodies/institutions about our new implementation.
