LIST OF UKRAINIAN INNOVATIVE PRODUCTS

1 UniExo	modular robotic exoskeleton devices
2 ServReality	virtual reality/augmented reality software development
3 Effa	disposable eco-clean toothbrush
4 Cardiomo	wearable ecosystem providing 24/7 heart monitoring and heart disease detection
5 TechNovator XE	a unique long-distance wireless solution that efficiently charges multiple devices simultaneously in the automatic mode
6 KTS-INTEK	a manufacturer and provider energy efficiency solutions based on ZigBee NAN technology
7 Briolight	electronic solutions for rehabilitation, advertising, interiors and entertainment
8 RAWR	an ultimately smart pet collar that protects and connects your pet to you no matter the distance
9 AXDRAFT	simple way to create mistake-free legal documents
10 SolarGaps	innovative solar blind technology to generate green energy
11 Morbax HR	digital talent management platform
12 Delfast	a smart transportation company with a world record holding electric bike
13 Fishball	the newest accessory to take advantage of the iPhone's powerful camera capabilities - with a 360° twist
14 SPRYBUILD	systems of additive manufacturing from photopolymers based on technology of high-speed continuous three-dimensional printing – CPWC
15 CamTouch	a device that makes it possible to turn any surface into an interactive one
16 SmartEAM	a service for automated maintenance of equipment, developed by experts of the corporation IT-Enterprise
17 4BioSens	a comprehensive support system for individual vitality of the elderly at homes and in nursing homes
18 FACTORY IN THE BOX	3D printing machines: all 3D printing technologies in one box
19 Ajax Systems	wireless security system for ultimate protection
20 LaMetric	a connected clock for your stylish smart home and smart office which motivates you with the key information at a glance
21 MegaDrone	remote monitoring systems for industrial purposes, drones' solutions in agriculture
22 Multidron	unmanned aerial and underwater vehicle
23 UATAG	a solution for product originality verification and counterfeit protection based on a two-level authentication technology
24 LABIRINT by RMRF	a distributed deception platform that provides an illusion of a real infrastructure to the attacker
25 FunLight	a location-based entertainment attraction for malls, FECs and theme parks powered by multiple projectors and motion trackers
26 EMwatch	a smartwatch that empowers a more mindful life
27 EFFI	climate panel, which transforms thermal energy into infrared rays that are directly heating all surfaces and objects in the room
28 Eventyr	turnkey solution for AR

IMPROVE THE QUALITY OF YOUR HEALTH WITH ROBOTIC TECHNOLOGIES

UniExo reduces the recovery period from injuries by assisting and supporting patients outside the healthcare facilities using modular exoskeletons. Our personalized physical rehabilitation solution can help regain and assists in the mobility of the limbs for 1.3 billion suffering people.

MAIN INDUSTRIES

Health, healthcare, wellness, robotics, civic tech, for army (healthcare).

PRODUCT UNIQUENESS

First, the main difference of our device is modular construction, which not usually used by companies. We propose a modular device of UniExo for each limb.

Second, thanks to machine learning algorithms for a device we provide smart rehabilitation and assisting of movements (it's the main commercial secret of UniExo). It's five times more efficient than using stationary devices. UniExo reduces the cost of treatment in three times due to the automation of human labor in rehabilitation processes (with machine learning algorithms).

SAVE TIME AND MONEY BY SWITCHING FROM PHYSICAL PROTOTYPING TO VIRTUAL REALITY

ServReality is all about the latest technologies, innovation, and smoother user experiences. We strive to help you make smarter use of network investments, saving you both money and time.

MAIN INDUSTRIES

Transportation and automotive, real estate and architecture, travel, accommodation and restaurants, shopping and E-commerce, events and planning, healthcare, pharmaceutical and sports, banking and fintech, learning, and training, gambling, betting, and entertainment.

PRODUCT UNIQUENESS

Tourist Social Project is the first part of a large-scale international project. Virtual guide around the city in the form of a famous character providing the ability to communicate with him.

The guide will offer you places to visit, suggest the direction and tell interesting facts about the attraction a user has approached.

Until now, various sightseeing and navigation systems for tourists with the use of augmented reality have been rather a concept lacking its implementation. Our goal is to change it.

THE CLEANEST TOOTHBRUSH EVER

Make the planet green again. Effa is a new word in the daily hygiene routine. It is a disposable toothbrush produced from recycled paper and eco-clean materials. Clean on every side.

MAIN INDUSTRIES

Travel, accommodation, and hotels.

PRODUCT UNIQUENESS

Six tons of disposable toothbrushes are thrown away each year around the world by hotels. Disposable plastic will be forbidden in most of the world until 2020. Effa is a disposable toothbrush made of paper and eco-clean materials, which makes it 100% clean.

The main ingredients are: paper, water-resistant biodegradable material, castor oil-based bristles, and eco-clean pill toothpaste.

BE CLOSER TO THE HEART OF YOUR LOVED ONES

Cardiomo is a continuous real-time medical-grade cardiac monitor that can help prevent life threatening events by early alerts for medical attention and ensuring better health through preventive care. Given the latest trends in the wearable device industry, in particular, a shift from fitness trackers to wearable patches, we are confident that Cardiomo is one of the most innovative products and the future of Wearable Technologies.

MAIN INDUSTRIES

Health, healthcare, wellness.

PRODUCT UNIQUENESS

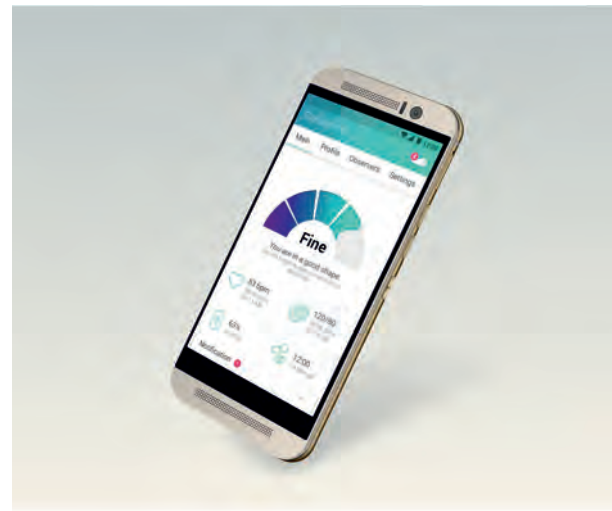

Cardiomo provides a revolutionary 'continuous' cardiac monitoring wearable that tracks vital signs (ECG, heart rate, breath rate, skin temperature) using new generation biosensors and AI to detect cardiac events with 99.63% accuracy and provide early life-saving alerts. The product is a waterproof wearable patch, which is suitable for long periods of wearing with a battery lasting for ten days. The data is channelled via a proprietary mobile app to a secure cloud and is analyzed using the AI engine trained on existing and ever-growing data sets.

REMOTE WIRELESS CHARGING OVER A DISTANCE IS NOW A REALITY

We make you free. An innovative system of wireless transmission of electric power at a distance – XE, that you would be free and you do not need to look for or always carry the battery charger with you.

MAIN INDUSTRIES

Mobiled devices, accessories, hotels, restaurants.

PRODUCT UNIQUENESS

XE technology has endless opportunities for people and businesses. Just to name a few:

- wireless charging of any portable consumer electronics products (e.g., smartphones, tablets, wearables);
- wireless charging of IoT sensors for smart home, smart office, Industry 4.0;
- consumer batteries wireless charging for people and businesses;
- wireless charging of POS terminals, scanners and Electronic Shelf Labels for retailers and logistics, etc.

EMBEE® HARDWARE PLATFORM FOR SMART GRID SOLUTIONS FOR UTILITIES

The platform is a flexible tool in the selection of components and AI software and the fast deployment of Energy Distribution projects with minimal CapEx and OpEx.

MAIN INDUSTRIES

LED lighting, infrastructure.

PRODUCT UNIQUENESS

KTS-INTEK Ltd is a manufacturer and provider of Energy Efficiency solutions based on ZigBee NAN technology. Our open EMBEE® hardware platform for Energy Distribution and different IoT applications is large-scale, FAN mesh network for sensors, electricity meters, Street LED fixtures, water meters that covers segments of Neighborhood Area Network (NAN) or Field Area Network (FAN).

EMBEE platform for a Utility company is low CapEx and OpEx of the project with a possibility to choose components (meters, sensors, street lighting lamps, etc.) on the bargain prices and with the opportunity to use information from the software for different solutions. Using own EmbeeloT platform, we can deploy different solutions for Utilities and Municipalities.

More than 120 000 pcs devices on the market from the 2013 year.

BRIOLIGHT

We develop unique interactive rooms for inclusive education and medical rehabilitation. Each room includes: interactive floor, interactive sandbox, interactive panel, controllers of large and excellent motor skills. Our software and hardware solutions combine efforts of Ukrainian scientists, medical workers, educators, engineers, designers, and programmers.

MAIN INDUSTRIES

Interactive system, interactive technology.

PRODUCT UNIQUENESS

The interactive floor is a large floor projection, sensitive to human movements. It is an interactive tool designed to teach, develop on reaction, attention memory, the accuracy of movements. Due to the game content, there is no sense of treatment. Interactive sandbox is a projection on real sand that develops coordination, fantasy, incorporates elements of sensory-tactile therapy. The interactive panel allows controlling programs with the help of movements of hands and trunk. The algorithms we create support to solve tasks for better coordination, high motility, and praxis problems.

Interactive systems add motivation to children for the renewal and development of both the motor and intellectual spheres. They are recommended to be used to improve the motor activity, and also as an element of the method of sensory integration in a complex of physical therapy for children with pathologies.

LOCATE. TRACK. MONITOR. PROTECT. ENGAGE.

Our world is full of dangers your beloved one's face every day - from getting lost or being hit on the road to suffering from separation anxiety. Introducing RAWR, an ultimately smart pet collar that protects and connects your pet to you no matter the distance!

MAIN INDUSTRIES

Veterinary medicine, healthcare, animals.

PRODUCT UNIQUENESS

At RAWR, we build ultimately smart wearable to make petcare stress-free. It's the first LTE (4G) Smart Pet Collar combining up to six different wearables – GPS Locator, Health Monitor, Fitness Tracker, Temperature Sensor, Training Collar, and LED Flashlight, in one sleek and customizable device linked to a visually appealing and user-friendly smartphone app.

RAWR

DRAFT YOUR FAMILY LAW DOCUMENTS WITHOUT MISTAKES. 7 TIMES FASTER

People are surprised by the breadth of work that can be automated. Even the most complex M&A deals have a lot of code-able patterns no matter the distance.

MAIN INDUSTRIES

Software, law, documentation procedure, paperwork.

PRODUCT UNIQUENESS

AXDRAFT helps reduce the time needed for documents drafting by 70% while eliminating mistakes and routine. Moreover, we process the data to build predictive machine learning to help further non-lawyers select the necessary options in legal documents and provide more support.

INNOVATIVE SOLAR BLIND TECHNOLOGY TO GENERATE GREEN ENERGY

Everyone is responsible for saving our planet. Not all of us have the opportunity to place solar panels on the roof. However, the window is the decision.

MAIN INDUSTRIES

Renewable and green energy.

PRODUCT UNIQUENESS

SolarGaps - external aluminum Venetian blinds with solar panels, which generate electricity. Smart blinds automatically track the sun. It can be used as an alarm clock in the morning and keep your privacy during the night. Easily controlled by your smartphone, Google Home, Amazon Alexa. SolarGaps protects your house from external influences, shade the room, allowing you to save on air conditioning up to 30%. At the same time, solar panels generate green energy.

E-BIKE WITH 236 MILES RANGE ON A SINGLE CHARGE

A Perfect Time to Get Your Personal Electric Bike.

MAIN INDUSTRIES

Healthy lifestyle, transport, bikes, smart gadgets.

PRODUCT UNIQUENESS

Delfast electric bikes support several power modes, including a system that allows you to feel assistance when you push the pedals. The presence of several modes also allows you to explore all the power of the motor on the racing track and comply with the requirements of legislation in different countries. A powerful lantern ensures the safety of movement together with navigation lights. In the dark, Delfast is ready to help you continue your journey. We put convenience and security at the heart of everything. It allows you to experience all the advantages of a modern electric bike

THE WORLD'S FIRST 360° SMARTPHONE LENS

Turn your iPhone into a fun, easy 360° camera instantly with Fishball.

MAIN INDUSTRIES

Mobile accessories, photo.

PRODUCT UNIQUENESS

The carefully calibrated dual fisheye lenses utilize your phone's built-in camera. Then the Fishball app stitches the raw images and videos into a 360 bubble that can be viewed in most video sharing platforms including Facebook, YouTube, and virtual reality headsets.

CREATING THE WORLD'S FASTEST ADDITIVE MANUFACTURING MACHINES

By creating CPWC technology, we are opening new opportunities for high-speed additive manufacturing of a wide variety of products from any photopolymers and compositions based on them.

MAIN INDUSTRIES

IT technology, IT equipment.

PRODUCT UNIQUENESS

At SPRYBUILD, we create systems of additive manufacturing from photopolymers based on our technology of high-speed continuous three-dimensional printing – CPWC. We intend to revolutionize the industry of additive manufacturing from photopolymers. We strive to provide a product to humanity that implements the functions of high-speed additive manufacturing while preserving natural resources and providing the highest standards of environmental safety.

INTERACTIVE PLATFORM

CamTouch is a device that makes it possible to turn any surface into an interactive one and manage it with a laser pointing or a special stylus.

MAIN INDUSTRIES

IT technology, IT equipment.

PRODUCT UNIQUENESS

CamTouch is an alternative to interactive equipment that in the form of boards, tables, and even kiosks rapidly burst into our lives and takes up more and more space in it. Educational institutions, banks, business structures, shopping centers are increasingly using these tools in their activities.

INTELLIGENT AAL-SYSTEMS FOR THE ELDERLY PEOPLE BASED ON THE INNOVATIVE 4-D BIOSENSOR

A comprehensive support system for individual vitality of the elderly at homes and in nursing homes. It registers the fall down and activities of an elderly person for prompt care and early diagnosis of various diseases.

MAIN INDUSTRIES

Social sphere, medicine equipment, charity institutions.

PRODUCT UNIQUENESS

4BioSens system allows customizing the functions of life support for a particular person due to the unique system of data collection from the combined sensor (4D-biosensor) and processing it with software, applying algorithms based on neural networks technologies, electronic key generation system for access to premises in emergencies, mounting of hardware modules onto DIN-rails for quick installation. 4BioSens may be integrated with existing Smart House or standard security and energy-saving systems.

Video cameras are not using for the monitoring of vital activity, which ensures adherence to privacy and confidentiality of data. At the same time, a senior does not need to put additional wearables on. The system allows analyzing the vital activity with accuracy to identify symptoms of diseases and exacerbations and to provide timely medical care.

WIRELESS SECURITY SYSTEM FOR ULTIMATE PROTECTION

We set ourselves an ambitious task to develop a security system from scratch, making it both a fashionable gadget and a serious professional solution. We believe in the future of the Internet of Things, based on security. And we are pleased that the market experts appreciated our work.

MAIN INDUSTRIES

Security system, security management.

PRODUCT UNIQUENESS

Ajax detectors include everything you need for full protection. High-precision sensors monitor what's happening indoors, and a powerful hub instantly broadcasts a signal to your smartphone and the off-site surveillance center at the first signs of a break-in. All Ajax detectors are connected to the Hub and include: intrusion protection, fire protection, flood protection, controls, sirens, automation, integration modules.

CONNECTED CLOCK FOR YOUR SMART HOME & OFFICE

Smart décor for mood and motivation. With its technical features, LaMetric Time brings the table clock up to date, so that it easily fits into home and office environments.

MAIN INDUSTRIES

IT equipment, IT design software.

PRODUCT UNIQUENESS

LaMetric TIME - connected clock for your smart home & office which motivates you with the vital information at a glance. It's like Apple Watch for your home and office, which makes information visible from a long distance. Time, weather, news, climate measurements, security alerts, digital metrics, sales figures, and other information come to you at a glance without seeking in smartphone or PC.

LaMetric SKY - mosaic own-shaped light panels that are aimed to brighten up a mood with different light effects, decorate the interior with paintings and motivate with social media counters, sales figures, and more.

INDUSTRY SOLUTIONS AND SERVICES

Monitoring, security, NDVI mapping, orthophotoplans, trichogramma dropping.

MAIN INDUSTRIES

IT equipment, manufacturing, innovation in the industry.

PRODUCT UNIQUENESS

MegaDrone is a developer and a manufacturer of unmanned aerial vehicles (UAVs), unmanned aircraft systems (UAS), control ground stations, systems of launch/landing UAVs, GIS software. A unique system, developed by MegaDrone and having no analogs! A fully autonomous monitoring system for industrial purposes, as well as in high-risk areas. SkyHawk consists of a box, a weather station, as well as RTK and X8 Vtol stations. The system works in automatic or semi-automatic modes. The base station manages the system using a VPN connection. GSM, Wi-Fi, or Sat are using as communication channels.

UNIQUE AUTHENTICATION TAG

Our mission to protect the global market from the forgery and counterfeit.

MAIN INDUSTRIES

Software, art, fashion, logistics transportation.

PRODUCT UNIQUENESS

UATAG protects high-end luxury goods and valuable items from counterfeiting using its unique unbreakable authentication tag, based on two-level security components:

- 1) physical - the uniqueness of the broken glass;
- 2) digital is basing on the blockchain ledger and data records.

Product's originality is verifying in two ways:

- 1) By scanning UATAG's QR code and comparing the unique crack pattern of the tag identifier with its electronic representation from the database on the smartphone screen.
- 2) By scanning the glass pattern of the tag identifier in the app downloaded to the smartphone. Once you scanned the glass, the app verifies it and gives the response about the item originality. The app would not be able to authenticate fake tags and products.

A DISTRIBUTED DECEPTION PLATFORM

LABIRINT provides an illusion of a real infrastructure to the attacker. It's based on Point - the smart imitation hosts. Each part of the mimic environment reproduces the services and content of a real network segment. LABIRINT provokes the attacker for actions and learns the suspicious activity at the same time.

MAIN INDUSTRIES

IT equipment, virtual reality.

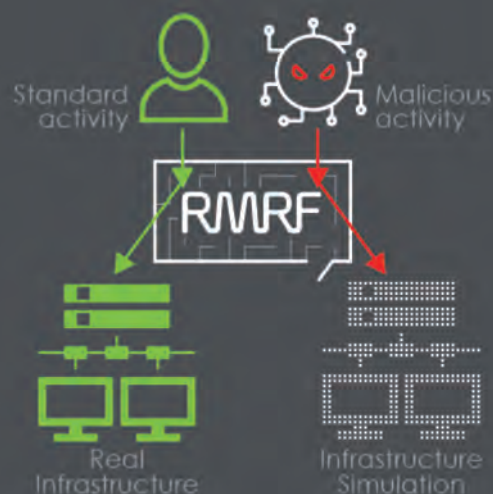

PRODUCT UNIQUENESS

- Smart host with Intelligent mimic features
- Multilayered deception network
- Configures scenarios according to the infrastructure

LABIRINT

INTERACTIVE ADVENTURES

The problem is that people play in quest rooms only once and never return because they already know the script. They are not interested. We created a room in which you want to return repeatedly.

MAIN INDUSTRIES

Entertainment

PRODUCT UNIQUENESS

- A professional audio system creates a surrounding sound for full immersion.
- Motion tracking sensors power all the interactions of visitors with the game world in the most natural way. No wearables or headsets used.
- Seamless video projection on the floor and all the walls will leave a strong and lasting visual impression.
